

## CHRISTIAN ENVIRONMENTAL SERVICES

Christian Environmental Services is one of the largest regional, refuse companies based in Missouri. Founded in 1978, we operate a fleet of over 50 trucks collecting residential, commercial, recycling and construction debris in Lincoln, Montgomery, Pike, St. Charles, St. Louis and Warren Counties. The company also owns and operates a transfer station in Lincoln County and provides hauling services from the St. Peters transfer station. In addition, we have a 20 year agreement to operate the City of O'Fallon transfer station which enables us to provide the most competitive rates for all your waste removal and recycling needs.

We are committed to implementing a seamless operational transition from trash hauling to recycling and trash hauling that reduces cost, maintains business accountability, and provides regulatory compliance and most importantly excellent service and safety to our customers.

Call us today to schedule your free waste and recycling assessment.

"Businesses large and small can do much to help themselves, their community, and the natural world by implementing a recycling program. A well designed program begins by purchasing products made from recycled materials, involves all employees to reduce your waste stream, and utilizes a solid waste company that provides dollar savings through single stream recycling instead of hauling all trash to a landfill."

City of Lake Saint Louis  
Green Environmental Advisory Committee

Funding for this project provided by the  
St. Louis-Jefferson Solid Waste Management District  
and the Missouri Department of Natural Resources

## COMMERCIAL RECYCLING

*Make Recycling  
Your Business*

*INCREASE RECYCLING  
&  
DECREASE YOUR TRASH  
COSTS!*

## Reasons why you should recycle:

- \* Recycling provides cost savings. By diverting waste from the landfill, you can save on average 25% from your monthly trash bill.
- \* Recycling boosts your company image, meets corporate initiatives and attracts new customers.
- \* Single stream recycling makes the recycling process easy! There is no sorting.
- \* Recycling helps protect individual and community health as well as the environment.
- \* Recycling conserves precious natural resources, since less raw material need to be extracted and processed. Manufacturing with recycled material also uses less energy than starting with raw material.
- \* Recycling extends the life of regional landfills.
- \* Recycling helps develop a sustainable workforce in these times of high unemployment.
- \* Recycling positively impacts your bottom line, and it is the right thing to do!

*If Americans recycled just one-tenth of their newspapers, we would save 25 million trees per year! And, many more millions of trees can be conserved annually by recycling paper and cardboard in the workplace. Why throw valuable commodities into the landfill when they can be recycled?*

## How we can help your organization implement a recycling program:

- Prepare a waste and recycling assessment and recommendations on how to set up your diversion plan.
- Make a presentation to employees so they feel some ownership in the recycling program.
- Provide literature, including "101 Ways for Your Business to be Green".
- Create recycling posters and decals to be placed in key areas of your business.
- Provide recycling containers for internal and external collection.
- Create monthly reports or tools to measure your success.

## What you can recycle:

- Office paper, newsprint, mixed paper, magazines, phonebooks, etc.
- Corrugated cardboard
- Aluminum, tin and metal cans.
- Plastic containers, excluding #6 styrofoam.
- Glass bottles and jars.

## Other programs that can be developed to recycle, reduce or reuse:

- Food and other organic waste
- Yard waste
- Construction debris
- Motor oil
- Wood pallets
- Electronics and appliances

## Offered:

### Small Volume Generators

Type	Size	Collections	Price
Single	95 gal cart	1 x per	\$15 per
Stream		Week	Month
