

Nature Park Development

Pictures 1 – 5 is the start of the trail and continues to where the creek crossing is being installed to connect the west and east sides of the park.

Nature Park Development

Picture 6 is of the crossing.

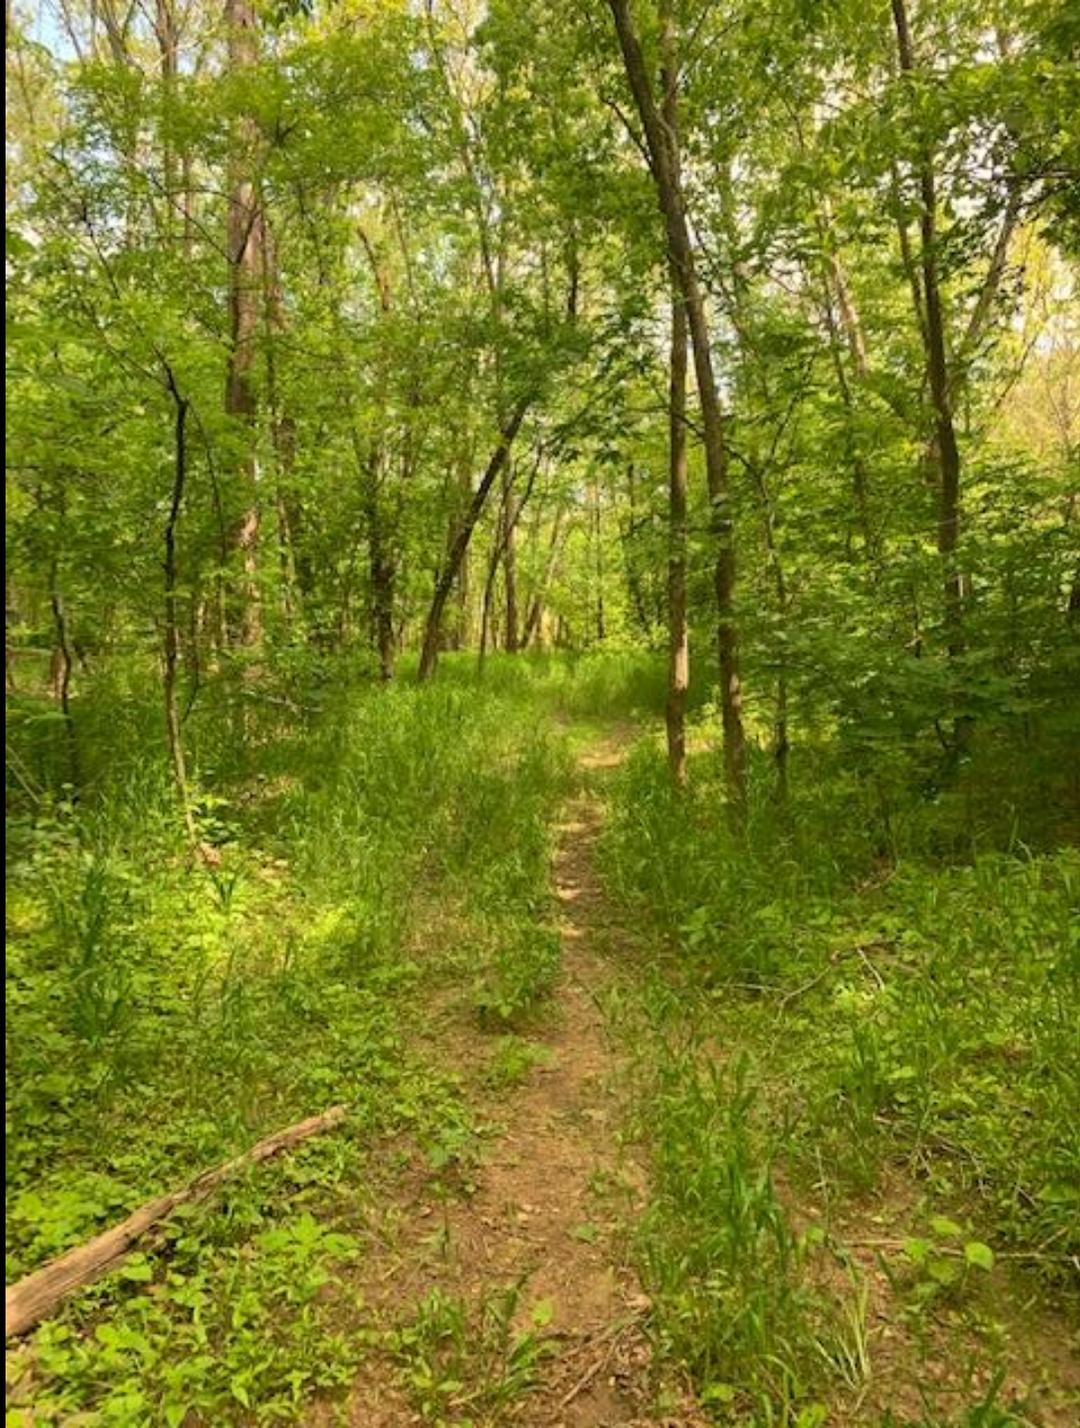

Nature Park Development

Pictures 7 – 13 continue on the west side of the creek, circling the seasonal wetland area.

Nature Park Development

Picture 14 brings us back to the creek crossing area.

Then we cross the creek and go uphill and follow a path to the left which leads to the glade area. Loop around the entire glade area and continue heading south into a smaller field which leads into the woods again. This leads through the woods until a drainage channel crossing, which is still bringing us south. Essentially making our way back to the property divide between the park and Wydnstone (property divide is power lines which you'll see in some photos,) and the trails eventually loop back north which will get us to the hill leading to the main creek crossing.
